November 12, 2004

Mr. Walter DeClue
960 Dale Street
Herculanum, Mo. 63048

Mr. DeClue:

The City of Herculanum Public Works Department has been closely monitoring the land subsidence situation across Dale Street from your property. Declining traffic volume, approximately in the Doe Run Voluntary Buy Out Area and cost of repairs dictate that the City place any plans for repairs on hold until it has been determined the future use of this area

After consulting with the Herculanum Fire Chief, it has been determined that the barricades creating a dead end on Dale Street and School Street pose no problems concerning accessibility or egress to emergency vehicles.

In the event that an agreement can be made between all associated parties to determine the future use of this area, the Public Works Department will expedite the engineering and secure the funding to make repairs and re-open Dale Street.

Respectfully Submitted,

Mike Abram
Public Works Coordinator
